

# Dental Hygiene Clinic

The NHTI Dental Hygiene program provides comprehensive patient-centered care through our [community-based Dental Hygiene Clinic](#). NHTI's dental hygiene clinic is place where community members can get dental hygiene care at a minimal cost in a classroom/learning environment with NHTI's student hygienists providing services.

The clinic helps to educate NHTI Dental Hygiene students to become competent professionals and increase public awareness of oral health. Quality dental hygiene care is critical to the well-being of every patient treated. NHTI Dental Hygiene students have been evaluated for lab and clinical competency prior to treating patients in the clinic and are closely supervised during treatment to provide optimal care.

The Dental Hygiene Clinic is located in MacRury Hall and is open to all NHTI students, faculty, and staff, as well as the public.
