

## ARET 102C : AutoCAD 3-D

This course introduces students to architectural 3-D CAD applications, 3-D manipulation of entities, and the creation and control of views in 3-D space through isometric and perspective projections. Topics include 3-D drawing, coordinate systems, viewing, rendering, modeling, and output options. On completion, students will be able to prepare basic architectural 3-D drawings and renderings. This course is part of the CAD Certificate program.
