

# VRTS 103C : Two-Dimensional Design

Provides a solid foundation in 2-D design and color theory. Students will learn the basic elements needed to form visual patterns and proceed to explore a variety of approaches relating to visual organization and pictorial composition. A section of the course will be dedicated to the fundamentals of color theory, its function, and application.

**Credits** 3

**Lab/Practicum/Clinical Hours** 3

**Lecture Hours** 2

**Learning Outcomes**

- Achieve a masterful competency of composition and the above 2D design objectives.
- Develop an accomplished portfolio of 2D assignments.
- Use design element vocabulary to successfully describe and execute strong designs.
